

I am against the introduction of LPFM stations taking priority over existing FM translator services. I would hate to lose my favorite station Air 1 88.9 in New Albany IN. This is a wonderful station that offers a family/teen format with wholesome rock music. This can not be found on any other local station and is a much needed music tool. Without Air 1 teens and young adults have no station except the top 40 channel to listen too. And unfortunately the top 40 music is filled with sexual references and disrespectful language. This is not music my children can listen too. Please don't push stations like Air 1 off our radio dial.
